

HOSPITALITY SOLUTIONS

With Ericsson-LG

Authorised Reseller

iPECS
AN ERICSSON-LG BRAND

The hospitality landscape is evolving quickly as travellers are increasingly demanding and every interaction is an opportunity to build customer loyalty. The challenge for hospitality is clear and iPECS communications from Ericsson-LG can help you meet these challenges head on.

Guest Satisfaction

Great communication is the lifeblood of any hotel and helps your team to deliver great service. Guests are also looking for quick and easy access to all of the hotels facilities and a combination of phone, TV and easy wifi access to provide your guests with all of the information they need to make the most of your hotels facilities.

Staff Training

With high staff turnover and limited available training time there is a great need for systems, processes and technology that is intuitive and easy to use. Equipping your team to excel at every opportunity is key to success.

Customers' Search for Value On-line

Searching for the best deal and researching through fellow travellers opinions is a standard part of the booking process for many guests. Online bookings often through aggregated booking sites all reduce available margins making it increasingly important to convert traffic from your own website. With the power of word of mouth and online opinion sharing your best customers are not only your best revenue generators but can also be your best sales channels. iPECS helps ensure the incoming calls are prioritised and handled by the best member of your team.

Brand Management & Customer Relationship Building

Returning guests can be one of the single biggest contributors to profitability and are an essential part of the mix in any hotel occupancy plan. Making guests feel at home and welcoming them back as old friends is the first stage in building great customer relationships.

Mobility

Constantly connected travellers can be better informed on aspects of your hotel and offers than your own team are if you don't equip them with the right tools to stay connected. In most hotels over 80% of the team is mobile and require different access solutions than just a desk based phone.

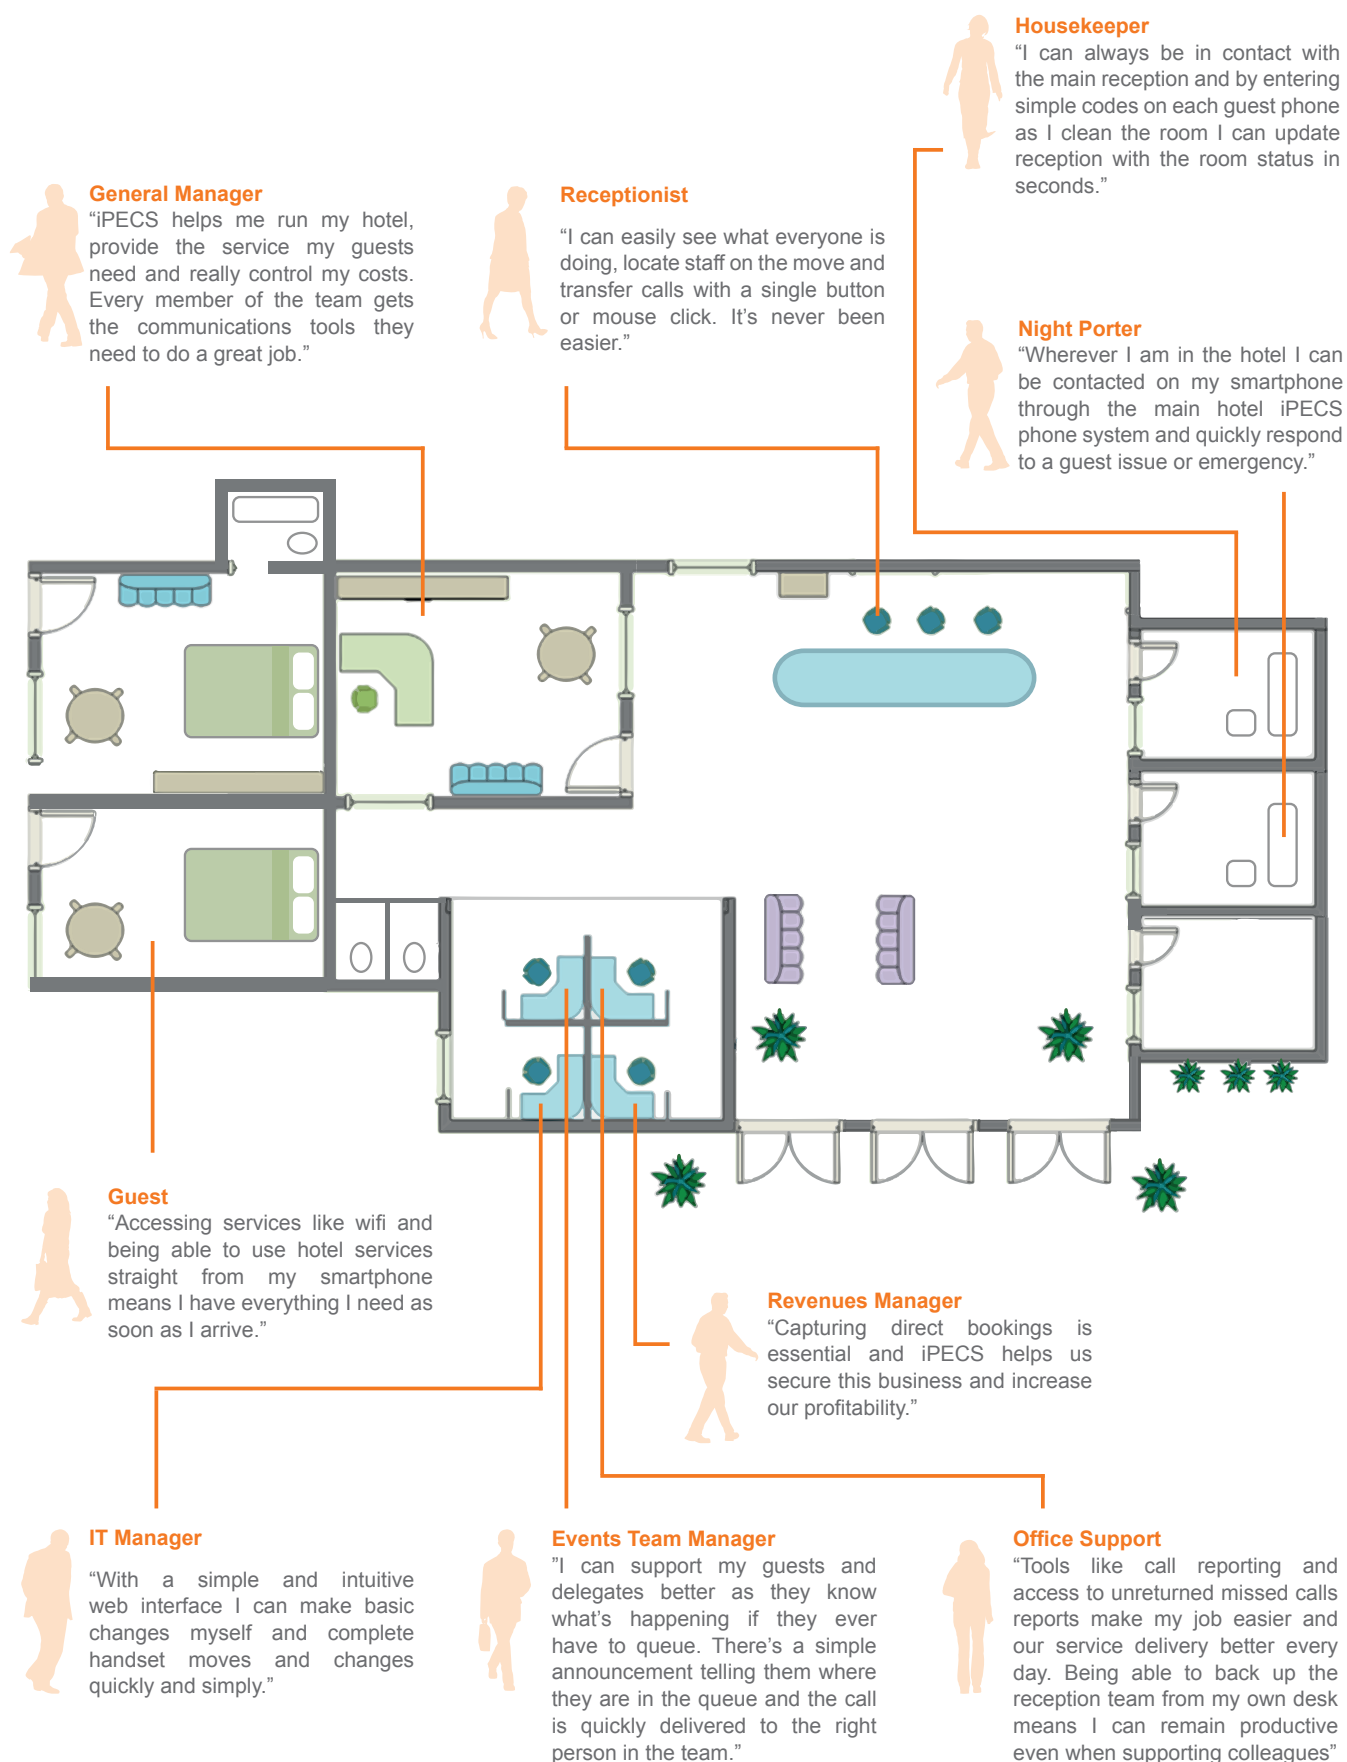

The New Normal

With the only constant being change there is no normal and guests are constantly challenging hotels to deliver new and different experiences, better value pricing and greater levels of service. iPECS communications platforms and applications can help your team to win in this new world through better communication and collaboration.

With these pressures and challenges there is no single answer to winning in today's competitive hospitality landscape. iPECS is part of the answer and feeds the flow of communications between your prospective guests, current guests, returning guests, booking teams and the whole hotel staff. Win with iPECS.

Communication for all of your team

Win With Ericsson-LG Hospitality Solutions

Enhance Your Guests Experience

Equipping your team with the right tools and support to deliver outstanding service will help ensure every interaction with your guests is positive. iPECS provides the right support and knowledge at the right time to always enhance your guests experience.

Tailored guest services

- On the guest room IP Phone, personalised greeting, multi-language voicemail and content can be delivered such as welcome messages with guest name display, language selection and one touch service keys.
- Meet-me conferencing calls ideally suited for business travelers.
- Baby listening for those traveling with children.

Mobility for better and faster guest service

- Wifi / DECT solutions enables your staff to be mobile and accessible in order to provide responsive guest service.
- Quickly and easily connect to any member of the hotel team, anywhere on their mobile phones to ensure guests get the rapid response they need.

Tools for your reservation team improves communication and ensures you capture more direct business

- Minimise customer waiting times and increase hotel marketing activities using iPECS call centre applications
- Provide personalised service or customised marketing promotions for guests by integrating telephony into your hotel CRM, PMS or sales database

Enhanced communication capability

- Room phone service with voice mail offering guests quick access to services.
- Recorded information about hotel services is available to guests to learn about offers or local information
- One-touch access to all services such as room service, gym or spa

Increase Your Revenue Streams

iPECS can support your efforts to increase revenue by helping you to engage each and every customer and each and every member of your team. Through enhanced communication services every guest can easily access services and capture information that helps you increase guest billing. Through iPECS advanced call handling you can also ensure you capture every opportunity to win business from incoming calls and opportunities generated through your website.

Rich IP Communications features

- iPECS communications platforms are designed to be 100% IP and enable hotels to build flexible, modular and powerful communications
- Value added hotel services can be easily accessed throughout the hotel.

Voice and video conference

- Ensure your team stay 100% up to date with all the latest offers and services and are motivated to communicate them to your guests using video and voice conference meetings

Hospitality contact centers for better customer interaction and guest services

- Prioritise calls from preferred guests or from the concierge floor.
- Offer appropriate messages or property advertising for guests on hold.
- Ensure your team is providing great service and rapid response times by monitoring calls and queues and reviewing statistical reports..

Mobility

- Enhance meeting and conference services by providing guests or event managers with mobility by paired link to their guestroom and their mobile phone with mobile extension.
- Enable delegates to answer their calls on their Wi-Fi or DECT phone, where coverage provided, or on their mobile phone if mobile extension or mobile client is used.

iPECS LIP-9070

Improve Staff Efficiency and Productivity

Efficient staff communications and collaboration are critical to maintaining high quality guest services as well as improving team efficiency and productivity.

Seamless communications with Unified Communications

- Presence based communication with iPECS can improve staff responsiveness and productivity.
- Easy communication and voice/video conferences

Provide staff mobility by smart phone clients paired with an office phone in one number

- Improve guest experience and work efficiency through seamless communication
- Let staff use their personal handset for work (BYOD: Bring Your Own Devices)
- iPECS UC mobile app

iPECS UC
for iOS

iPECS UC
for Android

UCS Desktop

IP Attendant Hotel for small and boutique hotels

- Ericsson-LG iPECS Attendant is a simple and affordable PC-based tool to control room status, room charges, hospitality communication and even simple PMS functions.
- With an easy-to-use interface answers to guest questions and requests are only ever a mouse click away
- Routine tasks such as setting multiple wake-up calls, DND and check-in/check-out can be completed efficiently so your team can devote more time to looking after your guests.

iPECS IP Attendant Hotel

Reduce Operational Costs

iPECS can help you reduce major cost areas by using a single IP network to manage your voice and data communications as well as reduce call costs by using SIP connectivity. This combined with iPECS modular architecture means you can deploy the physical technology as you require avoiding expensive cabling and network operator restrictions.

Centralised network management and remote monitoring

- Save money and gain efficiency by having a centralised, automated, and remotely managed network.
- Receive email notifications when an alarm is triggered on the system.
- Proactively respond to system alarms and significantly reduce the cost of downtime.

Embedded recording features in iPECS Attendant

- Guest calls or external calls to Attendant can be recorded and replayed.
- Call Record reports including time, attendant detail and phone number.
- Caller ID, called name and recorded file are all available.

Open & standards based architecture

- Leverage the benefits of network services like SIP trunking that can reduce call costs and deliver enhanced services.
- Easy integration of cloud-based services and business continuity plans.

Reducing staff training requirement

- Ericsson-LG hospitality solutions can reduce training requirements within a busy hotel environment. With an easy and intuitive interface new staff quickly become effective.

Power saving with Ericsson-LG IP phones

- iPECS LIP-9000E/IP88000E series handsets comply with the latest recycling directives and deliver power efficiency that helps your hotel stay green and power efficient.

iPECS Open Integration

Ericsson-LG iPECS Hospitality Solutions are designed to work as part of your workplace and provide integration into all aspects of the hospitality operation. Open integration into PMS solutions such as Micros-Fidelio and Tiger TMS ensure telephony is accessible and integrated into every part of your business.

- Deliver consistent experiences across multiple devices
- Fully integrate telephony into your own PMS and applications environment
- Terminals ranging from analog to multimedia IP Phones
- Value-added applications including attendant, mobile solutions and contact center
- UC & Collaboration solutions

Micros Fidelio

Integrate your PMS with iPECS

- Deep integration with Micros-Fidelio embedded into the iPECS
- Manage a single view of your guest across telephony and other services
- Check in/out, wake up call, room status, room cut off from a single point

Open PMS Integration

Integrate easily with your PMS

- Standards based open integration ensuring you can fully integrate iPECS into your applications
- Bi-directional interface ensures you can easily integrate and access services like check in/out and call accounting
- Integrated billing data ensuring you can accurately charge for services

GDC-800H(IP DECT)

- IP based DECT solution designed to leverage the power of your network
- Configure cost effective coverage across your building or campus with IP base stations and repeaters
- Simple to use and intuitive handset designed to support users across your business

Cloud and Connectivity

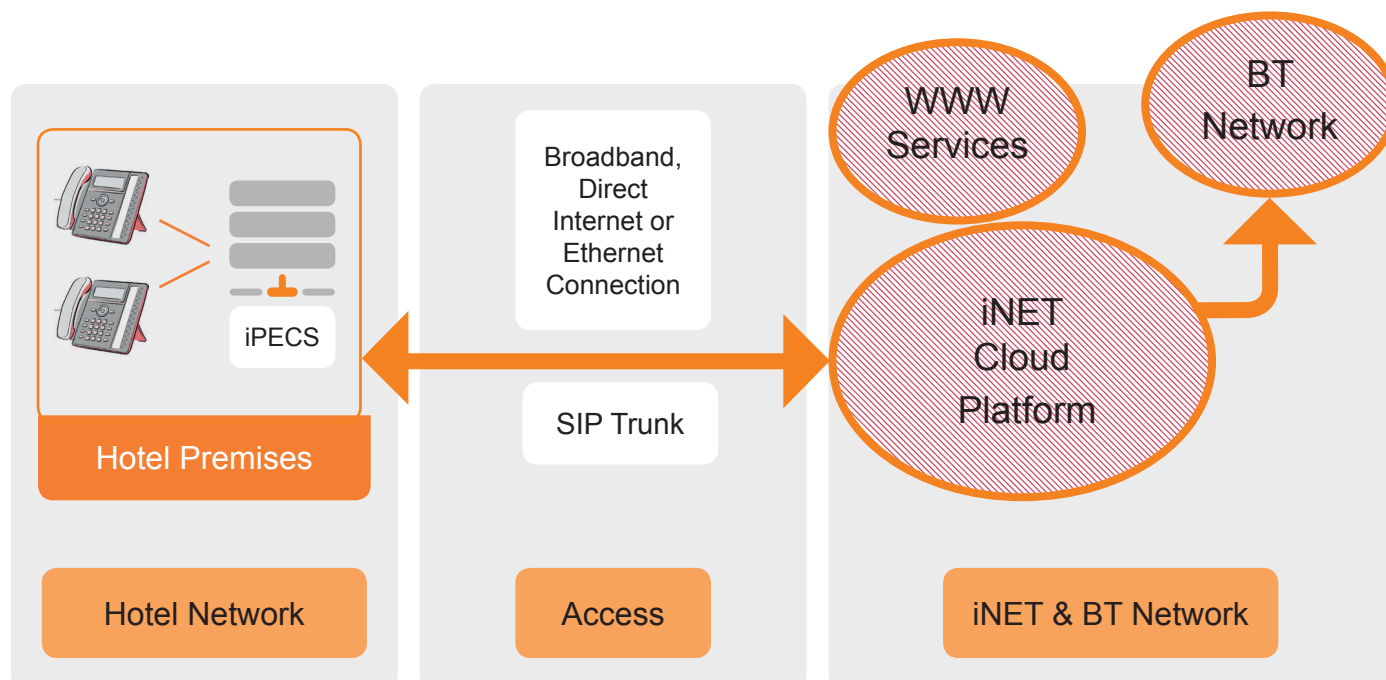

iPECS helps you leverage all the power of the network and unlock the enhanced capability of cloud services. With its inherent IP capability and available IP channels you can connect SIP trunks directly into your iPECS or utilise inbound services to access the power of the cloud. With SIP, ISDN30, ISDN2 or analogue connectivity options iPECS can be tailored to your communications environment.

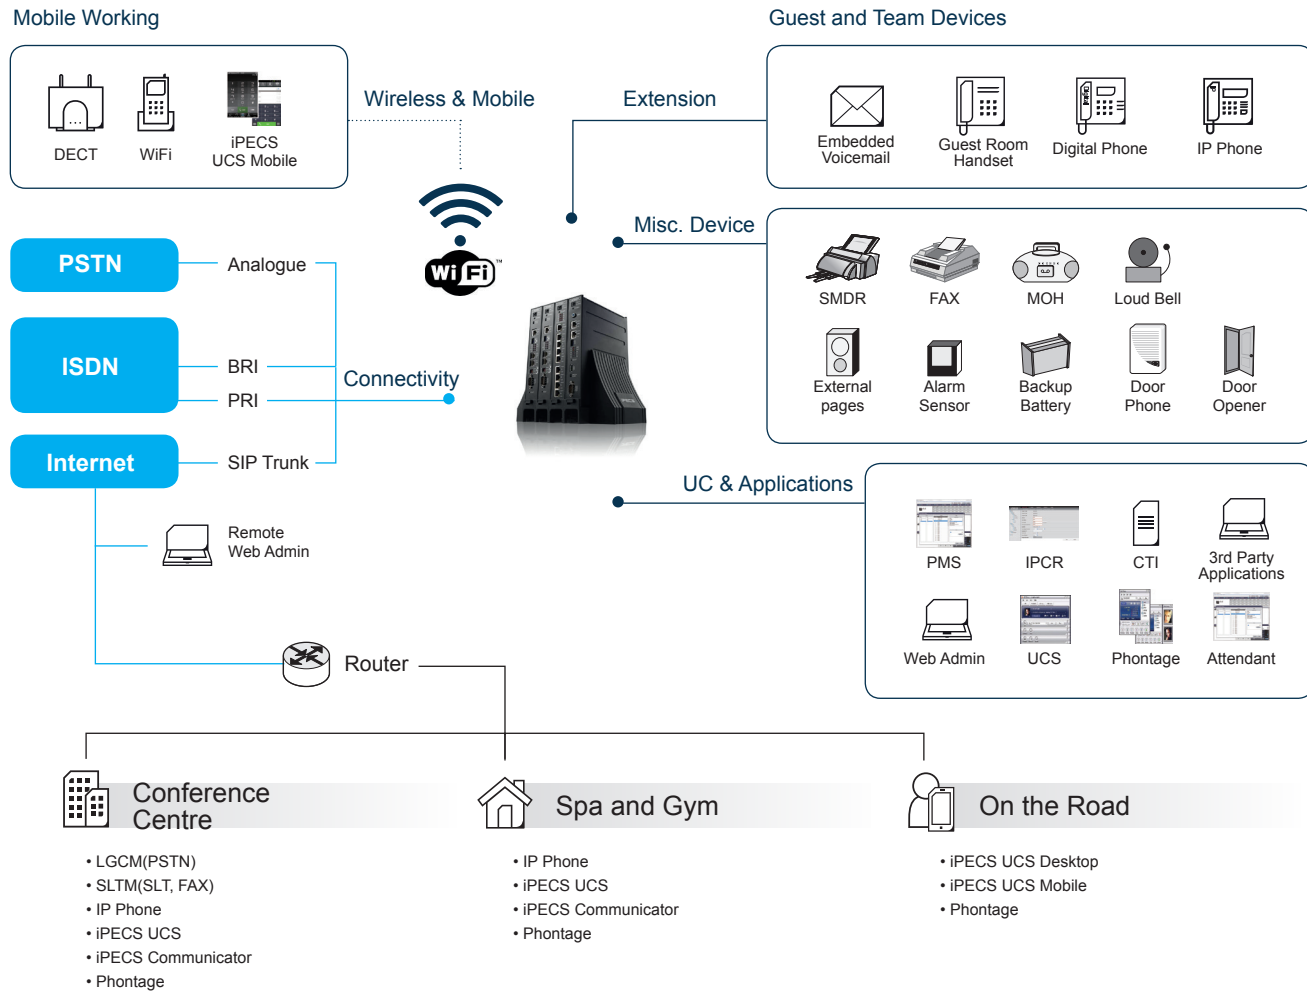

What is SIP?

SIP extends the IP capability of your iPECS beyond your own network and into the main telephony network enabling you to access improved call rates, significantly reduced monthly line rental and a range of cloud services to enhance the power of your iPECS. SIP trunks rely on good data connectivity and can utilise dedicated data connectivity such as broadband or your own established data links to connect your iPECS to the telephony network.

Cloud services can complement your iPECS with tools that integrate into your website and business process such as **Fax to Email**. **Fax to email** is a simple service that delivers all of your incoming faxes as emails helping you to keep track and easily save important fax communications..

iPECS Communication Platform

Why iPECS in UK Hospitality?

Ericsson-LG iPECS is used by hotels across the globe to deliver critical communications to teams based all over the world. The iPECS platform ensures teams stay connected to each other and to customers at all times. Key iPECS features include:

- On-demand or specialist call recording

All of this delivered at a cost you can afford and working with a local specialist iPECS authorised reseller who can help you implement a truly tailored communication solution. Start winning with iPECS today.

About Ericsson-LG Enterprise

Ericsson-LG is a joint venture company between Ericsson and LG Electronics, founded in November 2005. The combination of two of the world's largest technology companies delivers market leading communications solutions to enterprises of all sizes.

Ericsson-LG empowers enterprise customers and telecommunications operators around the world, with a full range of cutting-edge wired, wireless and optical telecommunications and networking technologies.

Ericsson-LG has 1,200 employees including 700 R&D manpower and is head-quartered in Seoul, Korea, with its R&D centre in Anyang, Korea.

Ericsson-LG Enterprise Solutions has 250 employees including R&D resources with a prime strength in designing, developing, manufacturing and marketing voice solutions.

Ericsson-LG Enterprise operates in over 60 countries around the globe and has been in the communications market for over 40 years. This heritage and market presence mean they truly understand enterprise communications and what it takes to provide reliable, resilient and highly featured communication platforms that help you win.

ABOUT US

Teleconnect have been looking after customer's communications requirements for over twenty years. From a simple analogue line installation to a multi site MPLS network, we apply the same level of attention to detail and project management.

Our customers are used to using us as a single point of contact for all their communications; we almost become part of their team and not just another supplier.

We hear so many stories from customers of how they have been passed from one supplier to another when there is a problem and nobody taking ownership of the situation and just dealing with it.

We like to sleep at night, so we do things differently.
